Pr2 24.03 eng

Please edit the following code by removing the "stdio.h" and replace it with "iostream". This means that every *printf* and *scanf* sentence must be changed to *cout* and *cin* respectively. The output must look exactly like with the original code.

http://pld.ttu.ee/~trkal/E/arrayLIFO%20(1).cpp

Extra – choose either the code you made for last week or HW1 and rewrite it in C++ (use C++ I/O and *new* instead *malloc/realloc*)

Send all your work to trkal@ati.ttu.ee and vladimir.viies@gmail.com
